Filip Szalewicz

Fractional CTO & AI Engineering Strategist
Supercharge Your Engineers with Data & AI
Rapid Innovation for Growing Companies

BIO

As a seasoned technology leader with 20+ years of experience, Filip Szalewicz brings enterprise-level data and engineering innovation to growing organizations. His track record includes:

- Architecting petabyte-scale data platforms for SaaS and fintech
- Reducing costs by $2M+ annually and generating $10M+ in new revenue
- Leading migrations to GCP/AWS and deploying ML for predictive analytics
- Building and mentoring teams of 50+ engineers across regulated industries

What sets Filip apart is his blend of deep technical expertise in cloud, data architecture and AI with business acumen. He doesn't just solve today's engineering challenges – he anticipates tomorrow's AI opportunities. Whether you're optimizing for product-market fit, scaling for growth, or integrating AI tools, Filip provides the strategic vision and practical roadmap to get you there.

As your Fractional CTO, he brings the same transformative approaches that powered Fortune 500 companies, tailored to your organization's unique needs and growth stage.

PROVEN RESULTS

20-40% ARR Growth Achieved
$2M+ Annual Cost Savings
Delivered 30-50% Cycle Time Reduction
2 Patents & AWS Certifications

HOW I CREATE VALUE

AI INTEGRATION & PROCESS REFINEMENT
From "AI is just hype" to "AI drives innovation and revenue" Recent client: Doubled rate of innovation to 4-6 features per quarter

FULL-SCALE TRANSFORMATION
From "Struggling with PMF" to "Accelerated growth and retention" Recent client: Boosted client retention to 92%+ with optimized engineering and client success

ENGINEERING AUDIT & OPTIMIZATION
From "Engineering is slow and costly" to "Teams deliver continuously" Recent client: Cut cycle time by 30-50% in 6 months

DOES THIS SOUND FAMILIAR?

- Your engineering cycle times are too long and value isn't scaling
- You're worried about team turnover but don't know where to start
- Your competitors seem to innovate faster with AI tools
- You need CTO expertise but can't justify $300k+ full-time
- Your tech team is solid tactically but lacks strategic direction

One conversation could accelerate your growth.
